PROFESSIONAL SUMMARY

Aspiring Software Developer with a strong interest in software engineering, web development, and backend technologies. Experienced in working with multiple programming languages, modern web development frameworks, and database management systems.

Proficient in Python and JavaScript, with hands-on knowledge of frontend and backend development. Familiar with networking concepts, Linux operating systems, software architecture, and data structures.

Passionate about continuous learning, problem-solving, and building practical software solutions. Currently focused on expanding full-stack development skills and gaining professional experience.

TECHNICAL SKILLS

Programming Languages

- **Proficient:** Python, JavaScript
- **Advanced Familiarity:** PHP, Go (Golang)
- **Familiar:** C, C++, C#

Frontend Development

- HTML5, CSS3
- Tailwind CSS
- Bootstrap
- React.js

Backend Development

- Node.js

- Express.js
- PHP
- Go (Golang)
- ASP.NET / .NET

Databases

- Microsoft SQL Server
- MongoDB
- SQL and Database Management

Content Management Systems

- WordPress

Networking & System Administration

- Completed Network+ and Security+ training courses
- Active Directory
- Windows Server
- Active and Passive Networking
- Fundamental Network Security Concepts

Operating Systems

- Linux
- Windows

Computer Science Fundamentals

- Software Architecture Fundamentals
- Load Balancing Concepts
- Data Structures Fundamentals
- Object-Oriented Programming (OOP)

CORE COMPETENCIES

- Frontend and Backend Development

- Problem Solving
- Database Management
- Understanding of Networking Infrastructure
- Software Development Fundamentals
- Continuous Learning and Technical Research

CAREER OBJECTIVE

Seeking opportunities to apply my technical knowledge, strengthen my software development skills, and contribute to real-world projects. Eager to grow as a Full-Stack Developer and collaborate with experienced development teams.
